

[PRODUCT OVERVIEW](#) / [DesQ](#)

Make the workplace work for everyone.

Book desks and meeting rooms, manage check-ins, and understand how shared space is used. DesQ brings workplace teams and employees onto one coordinated platform.

A purpose-built platform from Sabre Sphere. Use this overview to understand the scope and prepare a requirements discussion.

Key capabilities

Desk and room booking

Find and reserve desks, meeting rooms and shared resources within the rules your workplace team sets.

Check-in and booking visibility

Connect reservations to arrival through supported mobile and kiosk check-in journeys.

Location and resource administration

Organise sites, floors and resources so the booking experience reflects the physical workplace.

Workplace insight

Review booking, occupancy and utilisation information to understand patterns across your spaces.

Roles and approvals

Define who can manage resources, make bookings and approve requests, with an audit record of changes.

Kiosk management

Register on-site devices, configure their connection and monitor device health from the administration experience.

Follow the work

01

Find a space

Choose a location and a resource that fits the visit.

02

Make the booking

Reserve within the workplace's availability and booking rules.

03

Arrive and check in

Confirm arrival through the configured mobile or kiosk journey.

04

Learn from use

Review attendance and booking patterns to inform workplace decisions.

Plan the fit for your organisation

Which DesQ app does each team use?

Employees use DesQ Space on the web or DesQ Go on mobile. Workplace administrators use Space to manage resources and policies. DesQ Dock provides the on-site kiosk experience.

Can DesQ fit our workplace policies?

Booking rules, locations, roles and approvals form part of the product scope. Bring your attendance and space policies to a discussion so we can map them to the configuration and identify any gaps.

What should we prepare for a rollout?

Start with a location and resource inventory, the people who own each space, your check-in approach and identity requirements. Calendar, device and hosting arrangements should be agreed for the chosen deployment.

Product structure

DesQ Space The web application for bookings, locations, workplace rules, reporting and administration.

DesQ Go The mobile companion for employees to manage reservations, receive alerts and check in.

DesQ Dock The on-site kiosk application for QR-led access and check-in, connected to central device management.

Modules, integrations, availability, hosting and support are established in the agreed implementation proposal. This overview is not a contractual specification.
